Pocket billiards training device has overlay with indicia to indicate trajectory line that shows prescribed path for cue and object balls, and guide manual with English instructions enabling player to impart spin to cue ball

Abstract (Basic):

... The device has an overlay with indicia (20) to represent prescribed shots of a billiards game. A trajectory line extending from the object ball marker in the direction of pockets shows a prescribed path for cue and object balls. A guide manual with instructions in English enables a player to impart a desired amount of spin to the cue ball specific to individual shot.

... The overlay is placed on a playing surface of a pool table. A cue ball marker and the object ball marker in the indicia indicate the placement position for respective balls...

...Used for teaching pocket billiards.

...

...The device teaches a player to use English instructions on a cue ball for different shots so as to make a shot and also to setup the cue ball for another shot...

...The drawing shows a top view of an overlay according to a pocket billiards training device.

Pool bank shot teaching and training device - ...

...has pair of arms pivotally supported on base and are angle so inner
face of each is equal relatively

...Abstract (Basic): A planar base member is positionable on the playing
surface of a pool or billiard table which has a cushion rail
extending about the table playing surface. The base member has an
edge positionable parallel to and adapted to abut the cushion rail
at a position adjacent to the junction of the cushion rail with the
playing surface...

...First and a second guide arm each of the guide arms are
positionable on the playing surface of a pool or billiard table
and pivotally connected to the base member at one end. Each of the
pivotally connected arm ends having indicia carried thereon to
position each of the arms at a predetermined angle relative to the
member and relative to each other, for providing a guide adjacent to
which a ball may be passed to impact a cushion rail and adjacent to
which the ball may be passed when rebounding from...

...ADVANTAGE - Improves devices for use in increasing player's ability in
game of billiards or pool, permit practice of bank shots under
conditions which occur during game of billiards or pool, as well as
to practice and vary different aspects of bank shot such as speed of
ball, speed of spin, and direction of spin along same...

Billiards bank shot aiming device - ...

...has base movable along cushion and supporting plane mirror

...Abstract (Basic): A movable base supports a plane reflective surface above a billiard table such that the reflective surface is perpendicular to the playing surface and parallel to the face of a cushion. The bank shot is aimed by positioning the reflective surface longitudinally along the cushion opposite the target and relative to a billiard ball such that the billiard ball may be aligned directly with a reflected image of the target...

...An adjustment device is provided for varying the inward distance of the reflective surface from the face of the cushion, and for adapting the apparatus to billiard tables having various width cushions. A guide automatically positions the reflective surface at the predetermined distance inward from the cushion.

... a computer that displays a headshot of James - your
computer-generated coach.

The computer controls **mirrors** that aim the laser, which is inside
a unit mounted on the ceiling above the...initial positions and lines for
the path they should follow.

The computerised coach gives basic **pool training**, and the laser
traces outlines for practice exercises that steer you from simple control
of the **cue ball** all the way up to elaborate moves where the **cue ball**
bounces off three cushions.

After a shot, the laser outlines ...can ask James for an action
replay or extra help on where to aim the **cue ball**.

Pool pros aren't impressed, though. They point out that no matter
how well the...
